

VERTE® CHAINS

MAINTENANCE FREE

YOUR NEED : **A LONG LIFESPAN WITHOUT LUBRICATING**

“ My chain operates in an environment where maintenance is difficult or impossible or which is humid ”

“ My maintenance costs are too high ”

“ I would like an environment-friendly chain ”

OUR SOLUTION : **VERTE® CHAINS**

All the power of SEDIS chains without the maintenance

A **REGULAR LUBRICATION** of chains **GARANTEES THEIR SERVICE LIFE**.

However it is sometimes and for many reasons **difficult to implement**. The solution in a clean environment is the use of **VERTE® chains** («green chains»), which operate **WITHOUT OIL INPUT, EVEN IN A HUMID ATMOSPHERE AND IN WATER**.

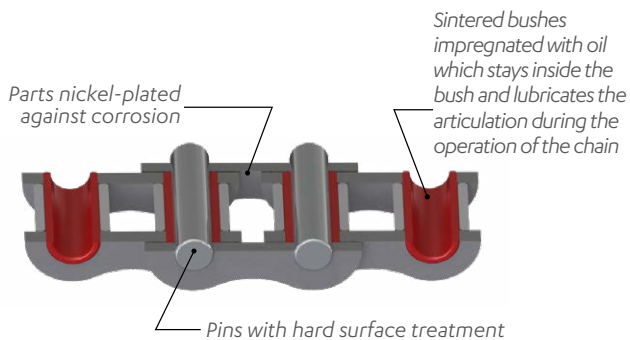

While **reducing the maintenance global costs**, the absence of lubrication allows a **reduction of risks** on your installations by:

- **Avoiding maintenance and contamination by oil projection**
- **Limiting risk of fire**
- **Decreasing risk of pollution**

The Verte® chains exist in 2 versions:

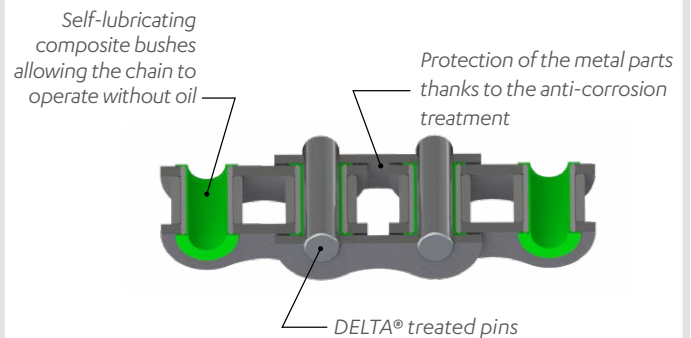

LUB FREE VERTE

USE : light loads / high speed / temperature from -5°C to +80°C *
PITCHES : from 12,7mm to 25,4mm

DELTA VERTE®

USE : heavy loads / low speed / temperature from -30°C to +80°C *
PITCHES : 12,7mm and from 19,05mm to 63,5mm

* Consult us for any Verte® chain selection or for any other use conditions

THE ADVANTAGES

**MAINTENANCE
AND SERVICE
FREE**

**HIGH RESISTANCE
TO WEAR & TO
CORROSION**

**SAVINGS OF
MAINTENANCE
COSTS**

**USABLE IN THE
FOOD INDUSTRY**

**ENVIRONMENT
FRIENDLY**

**SAFETY OF THE
INSTALLATION**
